

# Jakz Aizzat

Senior Frontend · Product Engineer

Malaysia (GMT+8) · [hey@jakzaizzat.com](mailto:hey@jakzaizzat.com) · [jakzaizzat.com](https://jakzaizzat.com) · [linkedin.com/in/jakz-aizzat](https://linkedin.com/in/jakz-aizzat) · [github.com/jakzaizzat](https://github.com/jakzaizzat)

*AI-pilled frontend and product engineer with 7+ years of experience building consumer products across web and mobile. Most recently shipped the mobile photo-editing experience for a product serving 680K+ registered users and 130K+ active users, with 2.3M+ creations.*

## Experience

---

### Senior Frontend Engineer · [Moshicam](#)

Remote, US | May 2024 - Present

- Own frontend delivery for a mobile photo editor with 680K+ registered users, 130K+ active users, and 2.3M+ creations, translating Figma and Loom specs into production iOS and Android experiences.
- Built editor workflows with Skia and Reanimated, including autosave and draft recovery, drag-to-reorder layers, and native-video workflows spanning signed uploads, playback, navigation, and subscription-aware watermarking.
- Launched subscription monetization across onboarding, discovery, editor, and post-creation surfaces, supporting localized pricing and lifecycle states from trial through expiration.
- Improved editor and feed performance by reducing rerenders, throttling snapshots, and deferring non-critical work; later took on product maintenance and migrated media delivery from Google Cloud Storage to Cloudflare R2.

### Frontend Engineer · [Gallery Labs](#)

Remote, US | Feb 2022 - May 2024

- Built the core social interaction loop—mentions, threaded replies, reactions, and notifications—across React web and React Native for 16K+ collectors of digital art.
- Built a virtualized drag-and-drop mobile editor for arranging digital collections, including row and section reordering, item selection, and complex gesture state.
- Expanded onboarding across email, Coinbase Wallet, and WalletConnect; improved large-gallery rendering through virtualization and established authenticated wallet E2E coverage with Cypress, Synpress, and GitHub Actions.

### Frontend Developer · [BetterTradeOff](#)

Remote, Singapore | Sep 2021 - Mar 2022

- Built React and TypeScript financial-planning tools for Singapore banks at a Series B fintech, creating reusable interfaces for goal, investment, and insight workflows.

### Frontend Developer, Contract · [CP Global Innovation](#)

Jun 2020 - Aug 2021

- Built frontend features across multiple client products using React, Next.js, and TypeScript.

### Frontend Engineer · [TAIGER](#)

Singapore | Jul 2019 - Apr 2021

- Built Vue.js product interfaces for an AI platform that automated banking operations and document-heavy workflows.

## Projects

---

### [CukaiMax](#)

- Built and launched an AI-assisted Malaysian tax product with receipt scanning, tax categorization, Supabase, and RevenueCat; grew it organically to 1,000+ registered users through Threads.
- Built and published a [Malaysian Tax Agent Skill](#) and public MCP integration for Codex, Claude Code, and compatible agents, enabling source-linked tax research through scoped, auditable workflows.

### Personal Agent Stack · [OpenClaw](#), [Hermes](#), [Codex](#), [Claude Code](#)

- Prototyped agents to automate recurring research, operations, and development tasks; built reusable skills and parallel-agent workflows for codebase research, implementation, E2E testing, and release verification.

## Education

---

### Universiti Teknologi MARA (UiTM)

- Bachelor of Computer Science, 2018 | Diploma in Actuarial Science, 2015

## Skills

---

**Languages:** TypeScript, JavaScript, Go, SQL

**Frontend:** React, React Native, Next.js, Expo, Reanimated, Skia, FlashList

**Product and Platform:** RevenueCat, GraphQL, Relay, MMKV, Mixpanel, Sentry, Supabase, PostgreSQL

**Web3 and Delivery:** Coinbase Wallet SDK, WalletConnect, SIWE, Privy, EAS, GitHub Actions, Cypress, Synpress

**AI and Tooling:** Codex, Claude Code, OpenClaw, Hermes, custom skills, parallel-agent workflows
